ADVANCED STUDY SKILLS

What are “Advanced” Study Skills?

Students often study hard but not effectively.

Advanced study skills emphasize **efficiency**, **retention**, and **metacognition** — thinking about how one learns.

Key Concepts & Strategies

1. Active Recall
2. Spaced Repetition
3. Interleaving
4. The Study Cycle
5. Metacognitive Reflection

Active Recall

- Test yourself > Rereading
- Example: Cover notes/diagrams and recall from memory

Spaced Repetition

- Review over intervals (Day 1, 3, 7...)
- Tools: Anki, Quizlet

Interleaving

- Mix subjects during study
- Boosts long-term retention

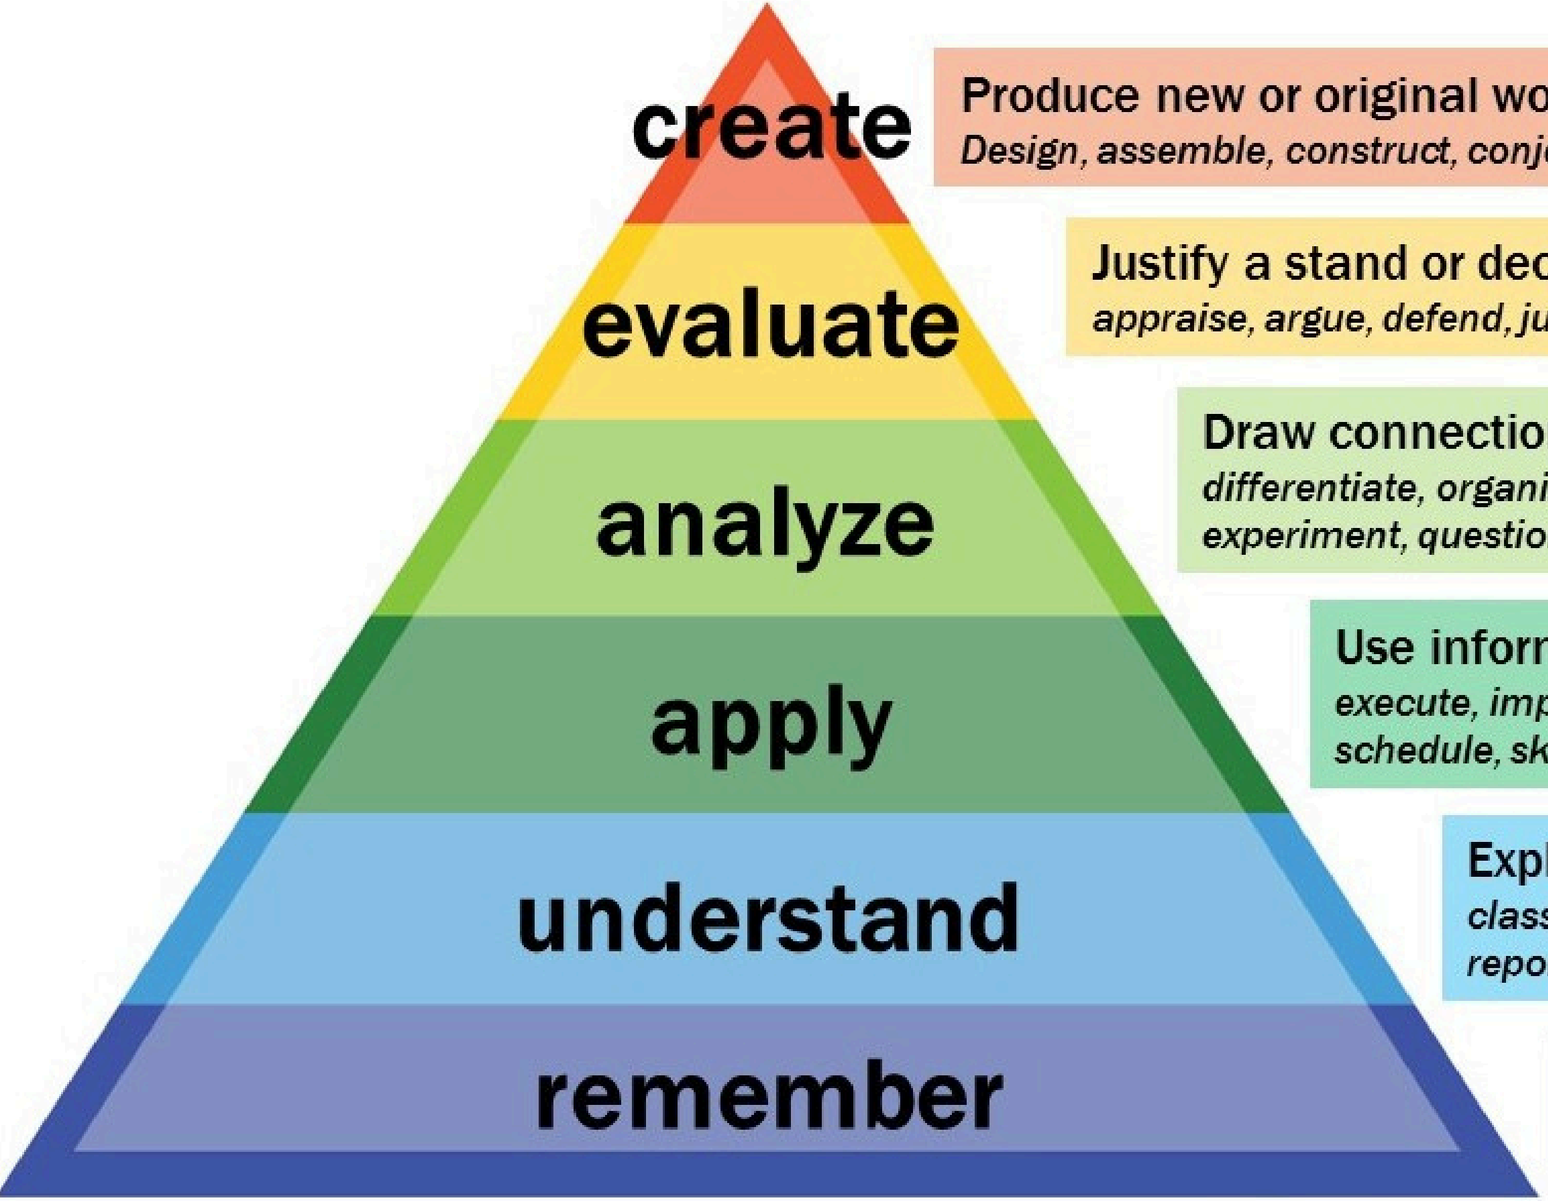
Self-Assess:

Self-assess and adjust

Metacognitive Reflection

- Ask: “What do I actually know?”
- Good coaching question: “What felt unclear in your last study session?”

Bloom's Taxonomy



Produce new or original work
Design, assemble, construct, conjecture, develop, formulate, author, investigate

Justify a stand or decision
appraise, argue, defend, judge, select, support, value, critique, weigh

Draw connections among ideas
differentiate, organize, relate, compare, contrast, distinguish, examine, experiment, question, test

Use information in new situations
execute, implement, solve, use, demonstrate, interpret, operate, schedule, sketch

Explain ideas or concepts
classify, describe, discuss, explain, identify, locate, recognize, report, select, translate

Recall facts and basic concepts
define, duplicate, list, memorize, repeat, state

Tips for Coaches

Teach students how to test themselves with blank sheets or flashcards.

Encourage students to time their review sessions with a calendar, not just intuition.

Reframe “studying more” as “studying better.”

Use Bloom’s Taxonomy to help students level up from “remembering” to “applying” or “analyzing.”

Activity

- Kahoot!
